Renderings

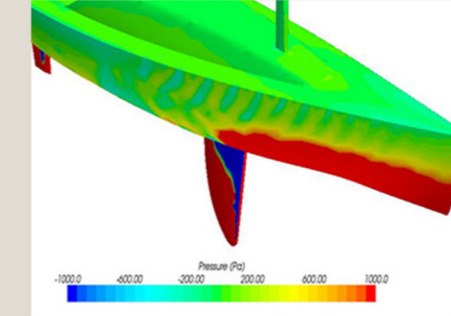

ENGINEERING

AREA OF COMPETENCES :

Motorcruiser
Superyacht
Sailing yacht

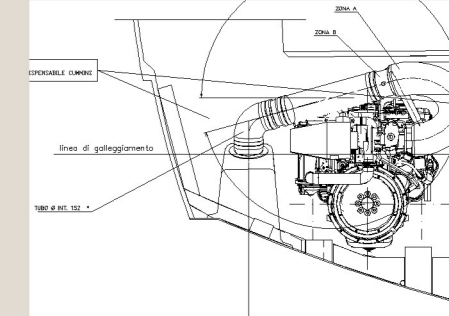

SKILLS

We can develop turn-key projects from concept and technical feasibility up to drawings details. We can also develop concept from the shipyards stylist with the same attention and dedition. All the projects are completed with 3D and 2D documentation.

SIMULATION

PHIEQUIPE can validate the single steps of the project with CAE simulation, or calculation by ISO. A particular attention is due to CFD simulation.

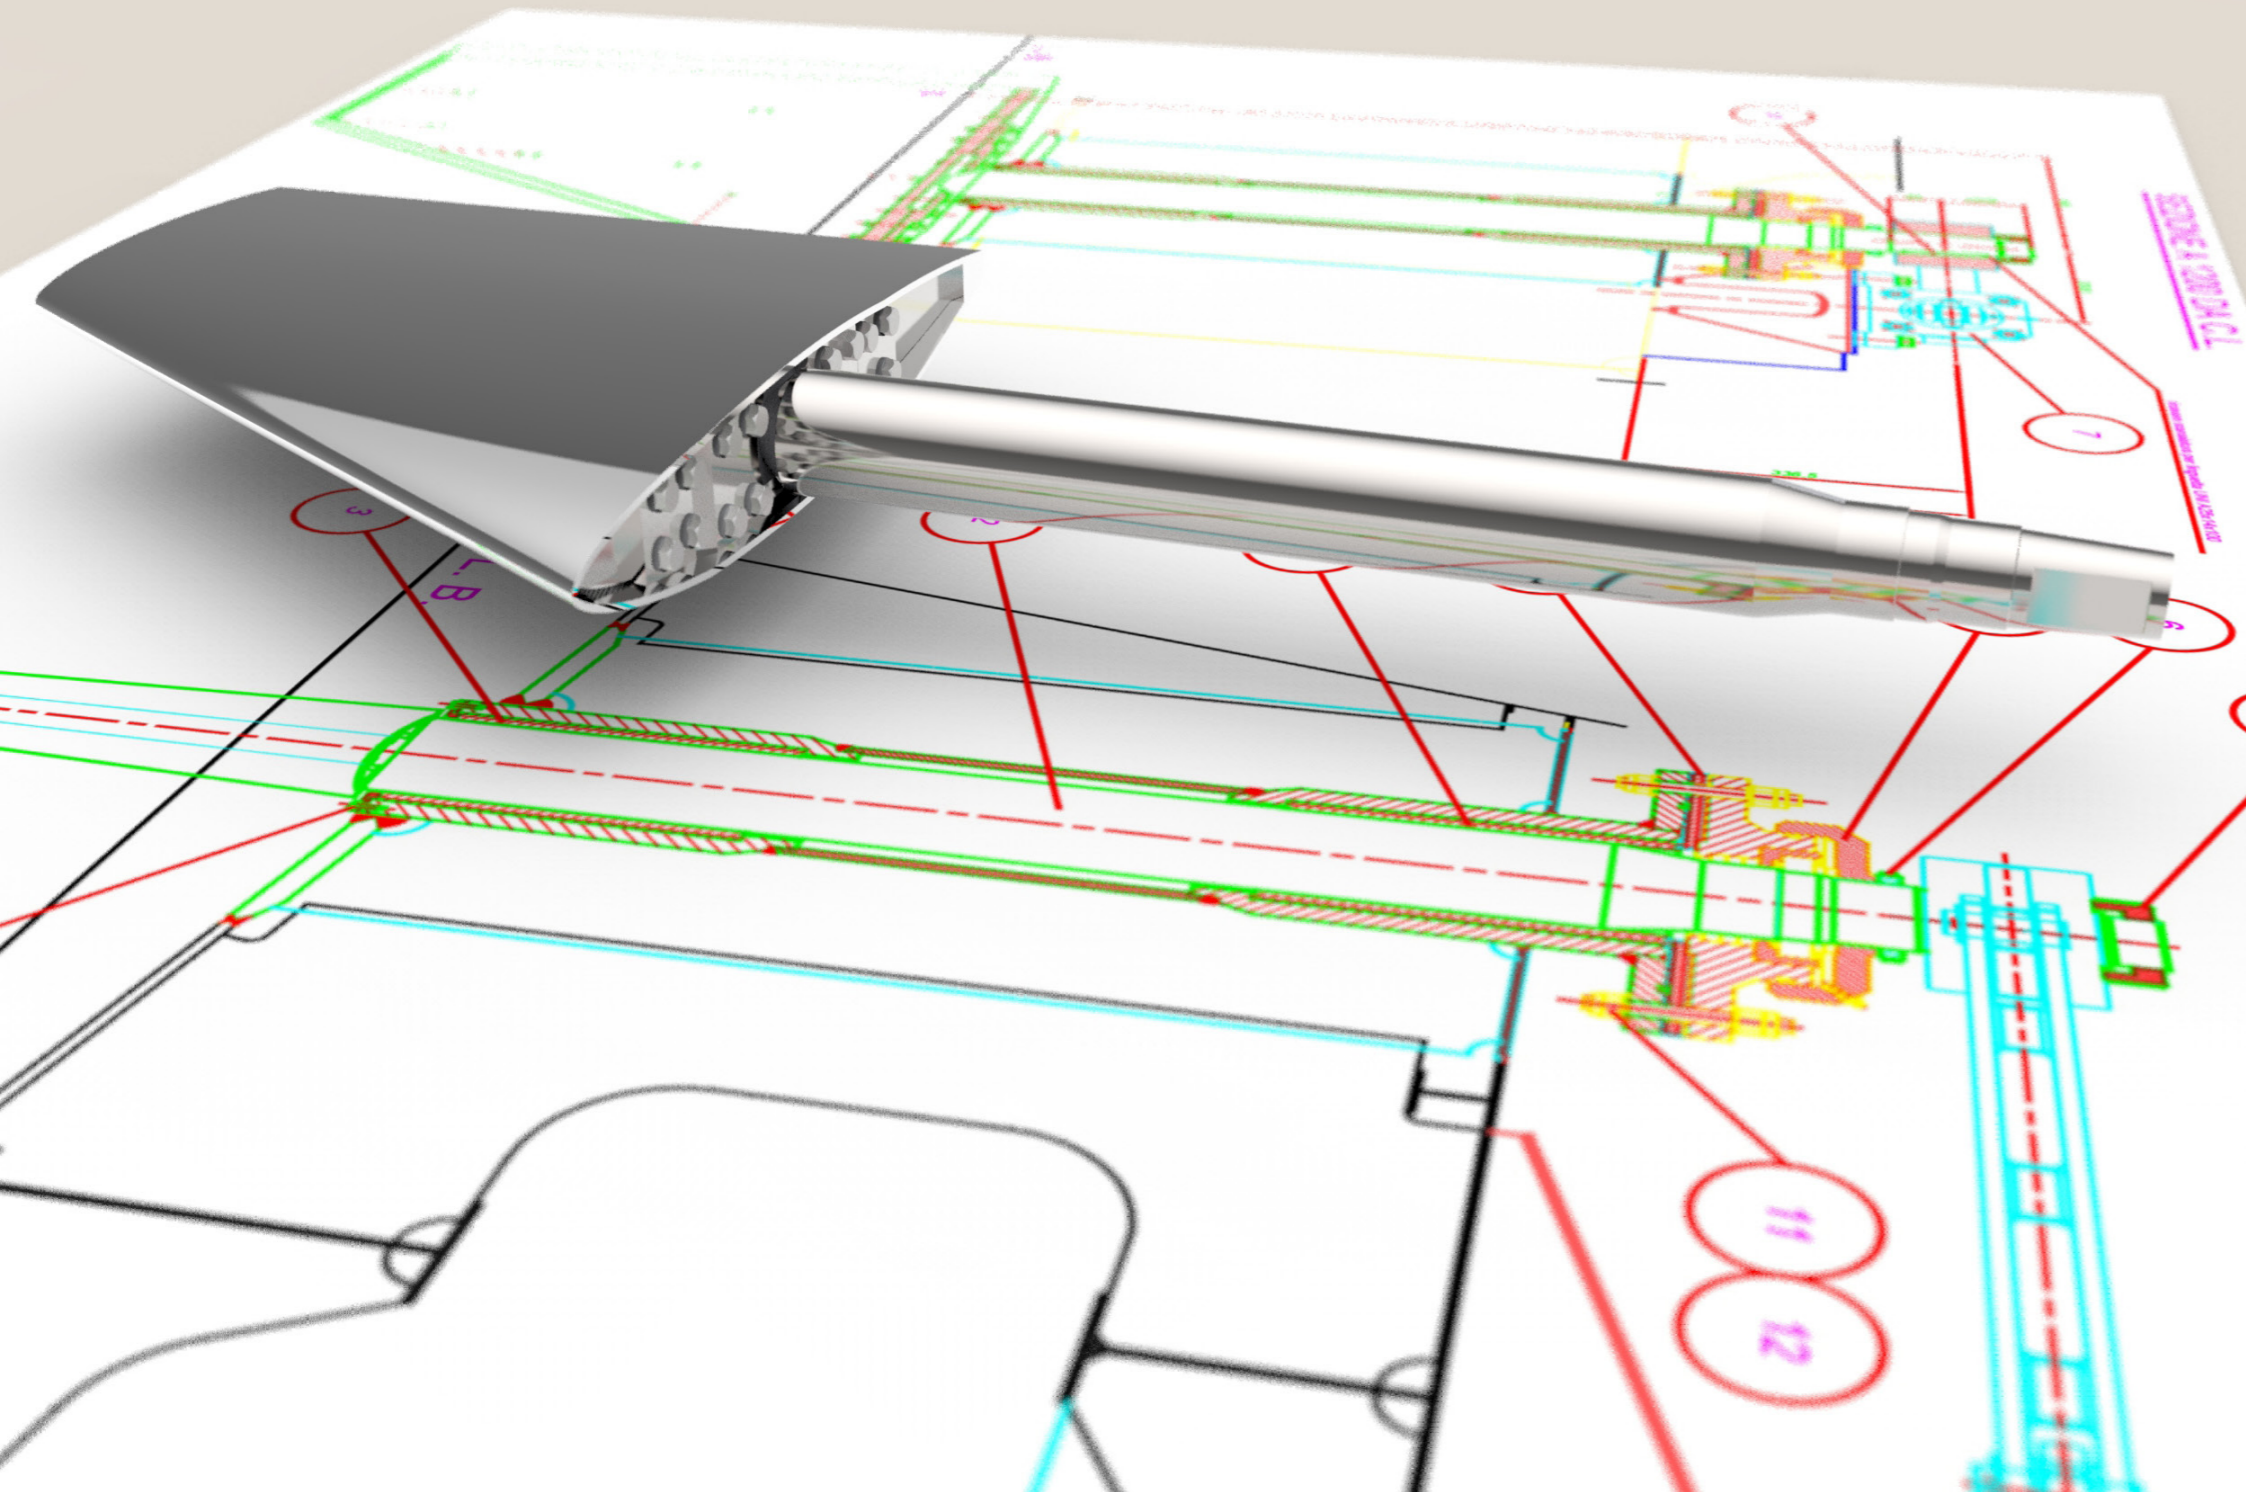

DETAIL DRAWINGS

PHIEQUIPE can develop the projects up to drawing details and BOM.

AREA OF COMPETENCES :

3D ready for machining
Equipments
Scheme and details
GRP lamination drawings
Steel or Aluminium parts
Engine installation
Shaft line
Omologation drawings
Furnitures
Customized versions

Our activity was born in 1997 in the area of automotive engineering, shortly after we started the development of the nautical area. We then developed industrial design activities.

We design the products form and its technical and industrial development.

The PHIEQUIPE team is composed of people with different background : engineers, architects, designers and technical specialists.

According to the kind of activity, the mix of these skills creates balanced groups for the work specific demands. Each team member brings his experience enhancing the knowledge of the entire group.

This logic makes fundamental not only the professional knowledge but also the human behaviour. It is necessary to have a great ability to work in team, to bring forth every ideas, always remembering the real world and the real requirements of the companies which choose us as partner.

Every kind of work has therefore the same importance and we face it always with the same devotion.
